Mission

Diversity Hub tackles intolerance, prejudice and conflict by supporting people to identify their leadership potential, and changes lives through building bridges and strengthening communities.

Objectives

Diversity Hub has a core set of skills and techniques. These exist with one purpose – to deliver the Mission. Diversity Hub's objectives are to:-

- Work with disadvantaged individuals and communities and support their development, by equipping people with leadership skills
- Reduce the level of conflict and violence in our society with a particular focus on harassment, bullying and domestic violence
- Increase young people's and adult's involvement in civic society
- Increase the skills and confidence of young people and adults so they can foster change
- Enable people to experience and see the positive and useful aspects of diversity
- Create a positive relationship and outlook between adults and young people and to enable adults to work with young people as leaders
- Encourage the development of greater emotional resilience for individuals and communities
- Enable parents/carers to support their children and young people in education and to make a contribution to wider society.

Values

Diversity Hub seeks to achieve its objectives in a manner consistent with its core values. These are based on these strong beliefs: we believe in

- individual worth – everyone is valued
- being welcoming to those who otherwise feel excluded from opportunities
- personal change delivered through people working together in groups
- the ability of people to bring about change in their communities by working together
- personal transformation as part of the process of becoming a leader
- everyone having a right to be heard.
